

WORKFORCE AGING IN THE NEW ECONOMY

A Comparative Study on
Information Technology Employment

This research is a multi-disciplinary, cross-national comparison of Information Technology (IT) employment and workforce aging in Canada, the United States, the European Union, and Australia.

Case Studies

As part of this project we will be conducting research with 16 IT firms. In exchange for participating in this research we will provide firms with company profiles, industry profiles, and best-practice management suggestions that are informed by a company specific analysis of human resource policy.

Institutions

Researchers on this project hail from the following institutions:

- University of Western Ontario, London, Canada
- Swinburne University, Melbourne, Australia
- University of North Carolina, Chapel Hill, USA
- University of Cambridge, Cambridge, UK
